

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

ESPERIA FUNDS SICAV DUEMME MONEY MARKET C CAP (EUR) ISIN: LU0342157749

This Fund is managed by Mediobanca Management Company SA

Objectives and Investment Policy

The investment objective of the Sub-Fund is to achieve a rate of return in line with the Euro money market yields. The Sub-Fund is a "Money Market Fund" in accordance with the European Securities and Markets Authority's ("ESMA") "Guidelines on a common definition of European money market funds"(the "ESMA's Guidelines").

The net assets of the Sub-Fund are mainly invested in short term income instruments and floating rate bonds according to the principle of risk diversification. These investments consist in debt securities, including bonds, Euro-bonds, certificates of deposit and other fixed or floating rate instruments issued by prime borrowers and in time deposits.

The Sub-Fund aims to maintain a weighted average maturity (WAM) for its portfolio of no more than 6 Months and a weighted average life (WAL) of no more than 12 Month. The Sub-Fund will only invest in securities that have a maturity at issuance or a residual term to maturity of 397 days or less. In calculating the maturity of an instrument, the impact of deposits, financial instruments, and any hedging techniques relating thereto should be taken into account. The frequency at which the interest rate of a floating rate instrument is adapted to market conditions (as contained in the terms of such instrument) will be considered in the calculation of such instrument's maturity.

For more information on the ESMA guidelines and definition of maturity for this Sub-Fund, please see the Prospectus of the Fund.

The investments of the Sub-Fund should be primarily denominated in EUR.

For the purpose of interest rates management, the Sub-Fund may buy and sell interest rate futures contracts in any

currency. The Sub-Fund may also invest in accordance with the terms of the Prospectus and ESMA's Guidelines, and on an ancillary basis, in other transferable securities, Money Market instruments, derivatives, including but not limited to options, warrants, futures, other derivatives traded either on a regulated market or OTC and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may also hold on ancillary basis liquid assets.

The Sub-Fund may also enter into swap transactions.

The Sub-Fund is open-ended which means that it may, at any business day on the request of the shareholders, redeem its shares at prices based on the applicable Net Asset Value per Share.

Income arising from the Sub-Fund is being reinvested.

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money in the very short term (3 - 6 months).

The Net Asset Value ("**NAV**") of the Sub-Fund will be determined on each Business Day in Luxembourg ("**Valuation Day**"). The redemption requests will be closed at 4.00 p.m. CET ("**cut off time**") in Luxembourg on the Business Day preceding the relevant Valuation Day.

Minimum Initial Investment: None.

Minimum Subsequent Investment: None.

The Sub-Fund' share class is denominated in EUR.

Risk and Reward Profile

This risk indicator is calculated using historical data, which cannot be used as a prediction for the future risk profile of the Sub-Fund. Therefore, the risk and reward category shown is not guaranteed to remain unchanged and the categorisation of the Sub-Fund may shift over time.

Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

At this time, the level of the risk and reward profile is equal to 1, due to the low volatility of the markets and instruments in which the Sub-Fund invests.

The risk and reward profile does not take into consideration the following risks, which can affect the Fund:

- credit risk: which are linked to the debt securities the Sub-Fund invests in;
- operational risk: which may occur due to technical issues for example natural disasters, misunderstandings and fraud;
- counterparty risk: which may occur due to the fact that the fund might have exposure through contract with third parties;
- liquidity risk: which may occur due to the fact that the level of investments is made in financial instruments that could have a low level of liquidity in some extraordinary circumstances for example in the case of market crash and default of debt claims on issuers side.

Charges for this Fund

The charges paid by the investors are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest
